# Introduction

Cost reduction has been a growing concern for all MNCs and SMEs globally. The main cost reduction strategies are: reduce manpower and improve productivity through digital technologies.

Custos allows efficient and effective supervision & monitoring of multiple sites. Our seamless wireless technology connects different sites concurrently. Site information can be monitored in back office at real time and reports generated can be exported to any other platforms for further analysis.

Custos is your key to low cost, high productivity and effective operation.

## System Capabilities:

Biometric identification System to prevent 'buddy clock in'

Alternative system capturing photo if biometric identifications failed

Future integration to payroll system possible

Report can be easily exported to Excel for further editing

Centralized Management

Wall mount bracket or stand customizable to requirement

Scheduled email attendance for standalone/cloud solutions

System and customization supported by local engineer.

Location based tracking to ensure sign in done onsite

Barcode reading for convenient ID entry

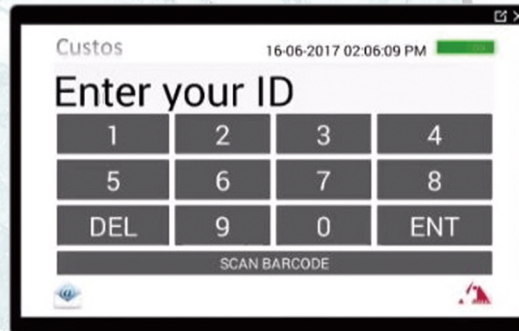

Phone apps that produce Live report view

System can connected to internet (Wi-Fi/Ethernet or SIM card and via broadband data) for centralized access
